

Team Collaboration with qmsWrapper

Team Messaging

qmsWrapper's chat is a purpose-built team collaboration app that has compliance built into its DNA to help foster and support team based regulatory compliance.

With the qmsWrapper, your team can focus on the essentials and work in real-time to get things done.

It's team collaboration in a smart way.

We invented qmsWrapper because we needed what you need:

A system to help get your projects done on time, and stay FDA or ISO compliant.

The Built-in Team Messaging is designed to Support Team Compliance

You can have 1-on-1 conversations, group conversations and topic-based conversations, where the threads keep discussions on-topic so the whole story stays together in a way that's easy to follow.

qmsWrapper enables project-based collaboration to ensure FDA 510K or ISO 13485 team based compliance.

Link your chat discussions to any particular project or task.

Save any Chat as a meeting to a particular project, complete with meeting minutes, agenda, scheduling, follow-up actions, add special ISO and FDA QSR attributions.

REMAIN ONE STEP CLOSER TO FULL COMPLIANCE. THERE REALLY IS NOTHING LIKE QMSWRAPPER.

The Team Compliance Module:

• Built-in, real-time chat conversations

The integrated messaging tool helps you stay in touch with your team. There is no need to switch from app to app. Stay focused on your projects, documentation, and QMS issues.

• Topic-based and group conversations

Topic-based conversations help keep your team on point for an ongoing discussion about a particular topic or a specific issue. Accomplish complex tasks through group chats and start brainstorming together.

• ToDo button

No pen? No problem! Create a quick ToDo in any conversation and schedule it so you can track it and follow-through.

• Chat Meeting Minutes

Easily create chat meeting minutes for any project or topic. Designate it as Routine, DHF, QMS, IP, Risk, or Administrative. Initiate the right follow-through and follow-up as FDA or ISO compliance requires.

• Create Meetings & Agenda

Follow-up is essential for compliance and smooth project running. Schedule follow-up meetings, attach the minutes, create the agenda and invite the right team players in one simple process.

• Save any conversation

Every message is archived in history, files shared or sent in chat are automatically stored in the Central Storage and can be linked to a particular project. They are available at any point in the future for reference.

• Sync with Storage

Files shared or sent in a Chat are automatically stored in Document management, and can be linked to a particular project. (That is QMS compliance made easy!)
